

How To Apply Decals

Supplies

- Scissors
- Paper Towels
- Tape Measure
- Masking Tape
- House Hold Cleaner
- Squeegee or Credit Card

Step One

Thoroughly clean the area. Avoid using glass cleaner, it might leave some residue. Make sure the surface is dry. DO NOT apply to rough surfaces, the vinyl won't stick.

Step Two

Use the masking tape to place the decal in its desired location. This will also serve as a "hinge" while you're applying the decal.

Step Three

Use line of text as a place to measure from to ensure it's level.

Step Four

Peel and cut off the bottom half of the decal backing. Then with a squeegee or credit card, press and apply the decal in a back-and-forth pattern.

Step Five

Gently remove the masking tape and repeat Step Four on the upper portion of the decal.

Step Six

Now, stand back and admire your job well done! Enjoy!
